

MarkTypst Sample Document

Generated with `mark-typst build doc.md` — Markdown → pandoc → typst → PDF.

Typography

Body text is set in **Georgia** (serif), headers in **Helvetica Neue Bold** (sans-serif) — both standard macOS fonts; swap in any installed font (e.g. from Google Fonts) via `.env`. You can combine *italic*, **bold**, ***bold italic***, inline code, ~~strikethrough~~ and footnotes¹ freely.

Blockquotes work too: “Typst compiles in milliseconds, pandoc speaks every Markdown dialect — together they make beautiful PDFs.”

Lists

1. Ordered lists
2. With multiple items
 - and nested bullets
 - like this one

Code

```
# syntax highlighting comes from pandoc
mark-typst init           # install tools + create .env & template
mark-typst build doc.md   # → doc.pdf in the same folder
```

Tables

Setting	.env variable	Default
Body font	FONT_BODY	Georgia
Header font	FONT_HEADERS	Helvetica Neue
Font size	FONT_SIZE	11pt
Paper	PAPER_SIZE	a4
Logo	LOGO	(empty)

Math & more

Inline math like $E = mc^2$ and display math:

$$\int_0^\infty e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

Images with relative paths work as well:

Figure 1: MarkTypst icon

¹Footnotes end up at the bottom of the page, typeset by typst.
